Dear *Owner/Occupier*

Our ref SEW-07728

**First Time Sewerage Appraisal at S & B Norfolk (Section
101A, Water Industry Act 1991)**

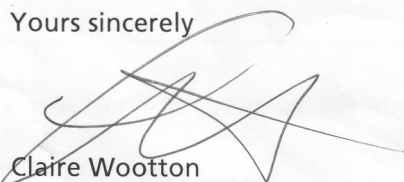

As you may be aware, an application has been made under Section 101A of the Water Industry Act 1991 for the provision of sewerage in your area.

To establish whether the area qualifies under the duty an assessment procedure has been determined complying with the DEFRA guidelines (see Appendix 12). To enable us to undertake this assessment, some information is required from each house owner, so I am sending you the attached questionnaire. Could you please return this form in the stamped addressed envelope provided.

In addition, we will be requiring to undertake a survey of your existing sewerage system, which will be undertaken on our behalf by Randall Surveys, whose staff will carry Anglian Water Contractor's ID cards. The survey will consist of examining your existing drainage arrangements, taking measurements and locating the position of tanks and pipes. We will **not** require access to the inside of any dwelling and the survey should only take a short time. Should there be any specific access requirements to your garden or if you do **not** wish us to enter your land please indicate this on the questionnaire.

Thank you for your assistance in providing this information, which is necessary for our appraisal.

Yours sincerely

Claire Wootton
Civil and Pipeline Engineer
